

MUHAMMAD HAROON RASHID

Full-Stack & AI Agent Developer

Faisalabad, Pakistan | haroon11005@gmail.com | +92 347 6379600 | github.com/haroon9595 | linkedin.com/in/muhammadharoonrashid848777287

PROFESSIONAL PROFILE

Full-stack and AI developer specializing in autonomous AI agents, workflow automation, and production web systems. Proven record building end-to-end solutions from data extraction and vector search pipelines to client-facing dashboards and enterprise lead operations. Experienced with Python, FastMCP, n8n, Next.js, and PostgreSQL.

EXPERIENCE

AI Automation & Full-Stack Developer | IES Group — Engineering Firm | 2026 – Present

- Architected and deployed an AI-powered inquiry classification and lead routing system with n8n Cloud, Groq LLM, and Zoho SMTP across 4 company departments.
- Configured enterprise domain email infrastructure including SPF, DKIM, and MX routing protocols for seamless client communication.
- Engineered the EPADS tender intelligence system and WhatsApp assistant for real-world government bidding workflows, reducing manual tender discovery time significantly.
- Built and deployed high-performance corporate web platform with Vercel and Render CI/CD pipelines.

FEATURED SYSTEMS & PROJECTS

EPADS Tender Intelligence System + WhatsApp Assistant [Built for live bidding]

- Automated crawler and parsers for government tender listings, change detection, and SQLite caching.
- FastMCP server exposing search_tenders and get_tender_details tools for AI agent orchestration.
- WhatsApp chatbot delivering structured tender cards and export commands for Excel, PDF, and Word reports.
- Stack: Python, FastMCP, SQLite, WhatsApp Integration, Scheduler, CLI

HostelDesk — AI Complaint Management System [Built end-to-end]

- Multi-channel platform converting conversational Slack reports into structured PostgreSQL complaints.
- n8n AI agent with LLM memory and automated Resident Tutor dispatch based on residential blocks.
- Next.js 14 management dashboard with real-time status history tracking and FastAPI webhook backend.
- Stack: Next.js 14, n8n, Slack, PostgreSQL, FastAPI, Vercel, Render

IES Group — AI Lead Routing & Corporate Platform [Client Project]

- Delivered for Inter Engineering Services: automated LLM inquiry classification across four engineering teams.
- Automated response dispatch with Zoho SMTP and Supabase historical archiving.
- Stack: n8n Cloud, Groq LLM, Zoho SMTP, Supabase, Vercel

TubeMind AI — Video Question Answering System [AI Application]

- RAG application combining transcript extraction, FAISS vector indexing, and Groq-hosted Llama 3.3 70B for low-latency streaming responses.
- Stack: LangChain, FastAPI, Streamlit, FAISS, Groq

TECHNICAL SKILLS

Languages: Python, TypeScript, C++, C#, SQL

Backend & Automation: FastAPI, n8n, REST APIs, FastMCP / MCP, Docker, Webhooks

AI & Machine Learning: LLM Agents, Tool Calling, RAG, LangChain, pgvector, FAISS, Groq APIs

Frontend & UI: Next.js, React, Tailwind CSS, Streamlit

Data & Tools: PostgreSQL, SQLite, Supabase, Pandas, NumPy, Git, GitHub, Claude Code

HONOURS & EDUCATION

- Claude Code in Action — Anthropic Education (May 2026)
- Generative AI Application Developer — UETIANS / HEC Pakistan / Pak Angels (Top Performer)
- CM Laptop Award — Chief Minister Punjab (March 2025)
- Honhar Scholarship — Government of Punjab (October 2024)
- BS Computer Science — UET Lahore (2024–2028)
