SUMMARY

Full-stack developer building AI-driven systems and automation for real business workflows. I take a problem from raw data or a manual process to a deployed product: backend APIs, data pipelines, AI agents, chatbots and dashboards, including hosting, domains and email infrastructure. Open to full-time roles and project-based work.

EXPERIENCE

AI Automation & Full-Stack Developer | IES Group (Engineering Firm) 2026 – Present

- Designed and deployed an AI-powered lead routing system (n8n Cloud, Groq LLM, Zoho SMTP) that classifies incoming inquiries and routes them to the right department across four departments.
- Built and deployed the company web platform (GitHub to Vercel) using AI-assisted development, and configured professional email infrastructure (Zoho Mail: MX, SPF, DKIM) for four department addresses.
- Built the EPADS tender intelligence system and WhatsApp assistant to support government tender bidding.

KEY PROJECTS

EPADS Tender Intelligence System + WhatsApp Assistant | Python, FastMCP, SQLite

- Automated the manual process of searching and reading tenders on Pakistan's EPADS portal: crawler and parsers for tender listings, details and standard bidding documents, with SQLite storage and change detection for updated tenders.
- Built a FastMCP server (search_tenders, get_tender_details) so AI assistants can search and read tenders, plus a daily digest CLI with scheduler.
- Integrated a WhatsApp chatbot: send a tender ID and receive a summary card (agency, title, closing date, time left, bid security, required registrations) with export to Excel, PDF and Word.
- Live-tested against epads.gov.pk and covered by an automated test suite (31 tests).

HostelDesk: AI-Powered Hostel Complaint System | n8n, PostgreSQL, FastAPI, Next.js

- Built a full-stack system where students report issues conversationally through Slack; an n8n AI Agent (LLM + chat memory) creates complaints in PostgreSQL, auto-assigns the correct Resident Tutor by hostel, logs status history and sends real-time Slack DMs.
- Built a FastAPI webhook backend for status-update notifications and a Next.js 14 staff dashboard with filters and workload views; deployed on Vercel and Render.
- Designed the PostgreSQL schema for students, complaints, hostels, staff, roles and status history. Live: hostel-complain-management-portal.vercel.app

TubeMind AI: RAG-Based YouTube Video Chat Assistant | LangChain, FastAPI, FAISS, Streamlit

- Built a RAG pipeline with transcript extraction, chunking, HuggingFace embeddings and FAISS search, using Groq-hosted Llama 3.3 70B with streaming responses.
- Built FastAPI endpoints (/ingest, /chat, /chat_stream), fixed a production retrieval issue causing stale context reuse, and restructured the code into a modular backend/frontend architecture.

Other work: AgriScribe (GenAI crop-disease assistant, UETIANS / HEC Pakistan / Pak Angels Gen AI Hackathon), Facial Emotion Detection (CNN + OpenCV), Phishing Website Detection (ML), House Price Predictor (Streamlit).

TECHNICAL SKILLS

Languages: Python, TypeScript, SQL, C++, C#

Backend & Automation: FastAPI, n8n, REST APIs, MCP (FastMCP), Webhooks, Docker

AI: LLM agents and tool calling, RAG, LangChain, vector databases (pgvector, FAISS), prompt engineering, Groq APIs

Frontend: Next.js, React, Tailwind CSS, Streamlit

Data & Tools: PostgreSQL, SQLite, Supabase, Pandas, NumPy, Git and GitHub, Claude Code

CERTIFICATIONS & AWARDS

- Claude Code in Action, Anthropic Education (May 2026)
- Generative AI Application Developer, UETIANS / HEC Pakistan / Pak Angels (Top Performer)
- CM Laptop Award, Chief Minister Punjab (Mar 2025)
- Honhar Scholarship, Government of Punjab (Oct 2024)

EDUCATION

BS Computer Science | University of Engineering and Technology (UET) Lahore 2024 – 2028 (currently enrolled)

Intermediate (ICS) | BISE Sahiwal 2024 | Grade A

Matric (Science) | BISE Sahiwal 2021 | Grade A+

Languages: Punjabi / Urdu (native), English
